LIST OF CONTENTS

NUMBER 1

G.J. Wu and **R. Roy**	1	A new characteristics algorithm for 3D transport calculations
M.M.R. Williams	17	The probability density function of the multiplication factor due to small, random displacements of fissile spheres
A. Erdoğan and **M. Geçkinli**	35	A PWR reload optimisation code (*XCore*) using artificial neural networks and genetic algorithms
G.C. Bakos	55	Heat generation and corresponding energy saving in nuclear reactor shielding facilities due to γ-rays energy variation
M. Boroushaki, M.B. Ghofrani, C. Lucas and **M.J. Yazdanpanah**	63	An intelligent nuclear reactor core controller for load following operations, using recurrent neural networks and fuzzy systems
G.I. Balogun	81	Automating some analysis and design calculations of miniature neutron source reactors at CERT (I)
A. Keresztúri, Gy. Hegyi, Cs. Marázcy, I. Panka, M. Telbisz, I. Trosztel and **Cs. Hegedüs**	93	Development and validation of the three-dimensional dynamic code—KIKO3D
Technical notes		
S. Mark and **Y. Ronen**	121	Some aspects of ^{6}Li as a nuclear fuel for aneutronic fusion
Deng Li, Xie Zhongsheng and **Li Shu**	127	Monte Carlo transport and burnup calculation

NUMBER 2

S. Carlos, D. Ginestar, S. Martorell and **V. Serradell**	133	Parameter estimation in thermalhydraulic models using the multidirectional search method
H. Yapıcı and **M. Übeyli**	159	Power flattening in Prometheus breeder reactor using nuclear fuel and waste actinide
A. El-Sayed Abdo, M.A. El-Sarraf and **F.A. Gaber**	175	Utilization of ilmenite/epoxy composite for neutrons and gamma rays attenuation
N.K. Todorova and **K.N. Ivanov**	189	Investigation of spatial coupling aspects for coupled code application in PWR safety analysis

R.S. Modak and **A. Gupta** 211 A simple scheme for the direct evaluation of time-eigenvalues of neutron transport equation

S.B. Degweker 223 Reactor noise in accelerator driven systems

Technical note

S. Şahin, Ş. Yalçın, H.M. Şahin and **M. Übeyli** 245 Neutronic investigation of a hybrid version of the ARIES-RS fusion reactor

NUMBER 3

R.M. Cotta, M.J. Ungs and **M.D. Mikhailov** 261 Contaminant transport in finite fractured porous medium: integral transforms and lumped-differential formulations

C. Hellwig, U. Kasemeyer, G. Ledergerber, B.-H. Lee, Y.-W. Lee and **R. Chawla** 287 Interpretation of experimental results from moderate-power in-pile testing of a Pu–Er–Zr–oxide inert matrix fuel

M. Constantin, D. Gugiu and **V. Balaceanu** 301 Void reactivity and pin power calculation for a CANDU cell using the SEU-43 fuel bundle

E. Nichita and **F. Rahnema** 317 A heterogeneous finite element method in diffusion theory

G.Th. Analytis 349 Implementation of the renormalization group (RNG) k–ε turbulence model in GOTHIC/6.1b: solution methods and assessment

NUMBER 4

389 Editorial

A. El-Sayed Abdo, M.A.M. Ali and **M.R. Ismail** 391 Influence of magnetite and boron carbide on radiation attenuation of cement–fiber/composite

C. Liao and **Z. Xie** 405 The coupled kinetic and thermal-hydraulic three dimensional code system NLSANMT/COBRA-IV for PWR core transient analysis

H. Yapıcı 413 Study on transmutation of minor actinides discharged from high burn-up PWR-MOX spent fuel in the force-free helical reactor

S.M. Basha, R.K. Singh, R. Patnaik, S. Ramanujam, H.S. Kushwaha and **V. Venkat Raj** 437 Predictions of ultimate load capacity for pre-stressed concrete containment vessel model with BARC finite element code ULCA

M. Marseguerra, E. Zio, E. Patelli, F. Giacobbo, P. Risoluti, G. Ventura and **G. Mingrone** 473 Modeling the effects of the engineered barriers of a radioactive waste repository by Monte Carlo simulation

Technical notes

T. Obara, T. Miura, Y. Fujita, Y. Ando and **H. Sekimoto** 497 Preliminary study of the removal of polonium contamination by neutron-irradiated lead-bismuth eutectic

G. Joseph and **S. Chandrasekaran** 503 Criticality safety of fuel pins in a post irradiation examination cell

511 Corrigendum

NUMBER 5

M.M.R. Williams 513 The flat flux problem in one-speed neutron transport theory

W.J.M. de Kruijf and **J.L. Kloosterman** 549 On the average chord length in reactor physics

C.M.N.A. Pereira and **C.M.F. Lapa** 555 Coarse-grained parallel genetic algorithm applied to a nuclear reactor core design optimization problem

G.J. Wu and **R. Roy** 567 Acceleration techniques for trajectory-based deterministic 3D transport solvers

E. Valero and **I.E. Parra** 585 Reactor pressure analysis at the initial stage of a loss of coolant accident

E.F. Faria and **C. Pereira** 603 Nuclear fuel loading pattern optimisation using a neural network

Technical note

T. Hazama 615 Practical correction of dead time effect in variance-to-mean ratio measurement

NUMBER 6

H. Yapıcı 633 Determination of the optimal plutonium fraction in transuranium discharged from pressured water reactor (PWR) spent fuel for a flat fission power generation in the force-free helical reactor (FFHR) along the transmutation period

Y.P. Mahlers 651 Numerical study of optimal equilibrium cycles for pressurized water reactors

S. Şahin, Ş. Yalçın, H.M. Şahin and **M. Übeyli** 669 Neutronics analysis of HYLIFE-II blanket for fissile fuel breeding in an inertial fusion energy reactor

M. Andreani, F. Putz, T.V. Dury, C. Gjerloev and **B.L. Smith** 685 On the application of field codes to the analysis of gas mixing in large volumes: case studies using CFX and GOTHIC

M.E. Montesinos, J.L. Muñoz-Cobo and **C. Pérez** 715 Hilbert–Huang analysis of BWR neutron detector signals: application to DR calculation and to corrupted signal analysis

Technical notes

A.D. Caldeira 729 The WIMSD library in the ENDF/B format

H. Arab-Alibeik and **S. Setayeshi** 739 An adaptive-cost-function optimal controller design for a PWR nuclear reactor

NUMBER 7

J. Navarro-Esbrí, D. Ginestar and **G. Verdú** 755 BWR stability monitoring using adaptive methods

A. Lombardi Costa and **C. Pereira** 775 A neutronic evaluation of the Americium and Neptunium co-insertion in UO_2 fuel

D. Pankratov, S. Ignatiev, D. Ridikas and **A. Letourneau** 785 Estimation of ^{210}Po losses from the solid ^{209}Bi target irradiated in a thermal neutron flux

T.K. Thiyagarajan, S. Ganesan, V. Jagannathan and **R. Karthikeyan** 793 Generation of handbook of multi-group cross sections of WIMS-D libraries by using the XnWlup2.0 software

T. Takeda, Y. Tachibana, T. Iyoku and **S. Takenaka** 811 Heat removal performance of auxiliary cooling system for the high temperature engineering test reactor during scrams

N.M. Mirza, M. Rafique, M.J. Hyder and **S.M. Mirza** 831 Computer simulation of corrosion product activity in primary coolants of a typical PWR under flow rate transients and linearly accelerating corrosion

A.C.F. Guimarães 853 A new methodology for the study of FAC phenomenon based on a fuzzy rule system

Technical notes

J.S. Cassell and **M.M.R. Williams** 865 A note on the behaviour of a two group minimum critical mass problem as the slowing down length tends to zero

M. Segev and **G. Raitses** 873 The use of flux ratios to homogenize squared absorber cells

NUMBER 8

R. Sayareh, M. Ghannadi Maragheh and **M. Shamsaie** 883 Theoretical calculations for the production of ^{99}Mo using natural uranium in Iran

Y. Kitamura, H. Yamauchi and **Y. Yamane** 897 Derivation of variance-to-mean formula for periodic and pulsed neutron source

F. Jatuff, P. Grimm, R. van Geemert, M. Murphy, R. Seiler, R. Brogli, F. Giust, R. Jacot-Guillarmod, T. Williams, S. Helmersson and **R. Chawla** 911 Validation of axial pin power distributions in a 10×10 BWR assembly across an enrichment boundary under full-density water moderation conditions

Technical notes

G. Espinosa-Paredes and **J. Alvarez-Ramirez** 931 Scope and limitations of the structural and dynamic analysis of a thermal–hydraulic model

M.M.R. Williams 943 The effect of random geometry on the criticality of a multiplying system V: influence of the reflector

Correspondence

L.E. Weaver 951 Nuclear power holds new promise in the United States

NUMBER 9

M. Marseguerra and **E. Zio** 953 Model-free fuzzy tracking control of a nuclear reactor

S. Pelloni 983 Sensitivities of the proton beam current resulting from variations in the source term for a Pb–Bi cooled accelerator driven system with a Pb–Bi target

I.A. Reyhancan 1001 Measurements and statistical model calculations of activation cross sections for $^{19}F(n,p)^{19}O$ reaction between 13.6 and 14.9 MeV neutron energies

J.S. Cassell and **M.M.R. Williams** 1009 An integral equation arising in neutron transport theory

NUMBER 10

H.-G. Willschütz, E. Altstadt, B.R. Sehgal and **F.-P. Weiss** 1033 Simulation of creep tests with French or German RPV-steel and investigation of a RPV-support against failure

C. Notari 1065 Neutronic optimization of PHWR fuel

M.M.R. Williams 1075 Some further considerations on Goertzel's minimum critical mass problem

G. Ilas and **F. Rahnema** 1089 A Monte Carlo based nodal diffusion model for criticality analysis of spent fuel storage lattices

Technical notes

Y. Ronen 1109 The 2Z–N correlation related to the total delayed neutron yield of ^{243}Am

A.E. Aboanber and **Y.M. Hamada** 1111 Power series solution (PWS) of nuclear reactor dynamics with Newtonian temperature feedback

NUMBER 11

G. Kim, R. Machrafi, H. Ahmed, D. Son, V. Skoy, Y.S. Lee, M.-H. Cho, H. Kang, I.S. Ko, W. Namkung, J.H. Chang and **K.J. Yoo** 1123 Measurement of neutron total cross-section of Dy at Pohang Neutron Facility

A.O. Goltsev, V.D. Davidenko, V.F. Tsibulsky and **A.A. Lekomtsev** 1135 The influence of a non-uniform radial temperature distribution in the fuel on the results of calculation of transients

V.M. Maslov, Yu.V. Porodzinskij, N.A. Tetereva, M. Baba and **A. Hasegawa** 1155 Evaluation of resolved and unresolved resonance range of 232-U

K. Devan, G. Pandikumar, M. Alagan, V. Gopalakrishnan and **P. Mohanakrishnan** 1181 Effects of cross section sets and quadrature orders on neutron fluxes and on secondary ^{24}Na activation rate of a pool type 500 MWe FBR

Y.S. Kim, S.H. Jeon and **C.H. Jung** 1199 Fluorination reaction of uranium dioxide in $CF_4/O_2/N_2$ r.f. plasma

J. Lewins 1211 Book review

NUMBER 12

J.L. François, C. Martín-del-Campo, R. François and **L.B. Morales** 1213 A practical optimization procedure for radial BWR fuel lattice design using tabu search with a multiobjective function

M.C. Song and **K.J. Lee** 1231 The evaluation of radioactive corrosion product at PWR as change of primary coolant chemistry for long-term fuel cycle

M.O. Giménez, M.A. Schlamp and **F.R.A. Lima** 1247 Sensitivity analysis of the aerosols transport equation

F. Watanabe and **H. Konno** 1267 Space-dependency analysis of amplitude and decay ratio based on Forsmark noise data: new approach to contraction of space-dependent information on reactor stability

S.A. El-Wakil, A.R. Degheidy and **M. Sallah** 1283 Time-dependent neutron transport in a semi-infinite random medium

T.Y. Song and **N.I. Tak** 1297 Optimal design of HYPER target system based on the thermal and structural analysis of Pb–Bi spallation target and beam window

NUMBER 13

M. Ishii, X. Sun and **S. Kim** 1309 Modeling strategy of the source and sink terms in the two-group interfacial area transport equation

J.S. Cassell and **M.M.R. Williams** 1333 An application of the Wiener–Hopf method to the one-speed flat-flux problem in a half-space

S. Mittag, P.T. Petkov and **U. Grundmann** 1347 Discontinuity factors for non-multiplying material in two-dimensional hexagonal reactor geometry

A.C. de A. Mol, A.S. Martinez and **R. Schirru** 1365 A neural model for transient identification in dynamic processes with "don't know" response

Letters to the Editor

A. Gandini 1383 On the correct physical approach for ADS analysis

J.D. Lewins 1389 On Gandini's defence of generalised perturbation theory

NUMBER 14

A. Mazzolo, B. Roesslinger and **C.M. Diop** 1391 On the properties of the chord length distribution, from integral geometry to reactor physics

A.J. Arul, C.S. Kumar, S. Marimuthu and **O.P. Singh** 1401 The power law character of off-site power failures

A. Yamamoto and **S. Shiroya** 1409 Study on neutronics design of accelerator driven subcritical reactor as future neutron source, part 1: static characteristics

A. Yamamoto and **S. Shiroya** 1425 Study on neutronics design of accelerator driven subcritical reactor as future neutron source, part 2: kinetic characteristics

M. Marseguerra, E. Zio and **L. Podofillini** 1437 Model parameters estimation and sensitivity by genetic algorithms

W.T. Hwang, E.H. Kim, K.S. Suh, H.J. Jeong, M.H. Han and **C.W. Lee** 1457 Influence of predictive contamination to agricultural products due to dry and wet processes during an accidental release of radionuclides

T.L. Teng, Y.A. Chu, F.A. Chang, H.S. Chin and **M.C. Lee** 1473 The dynamic analysis of nuclear waste cask under impact loading

Technical note

H.-R. Kim, S.-K. Kim, B.-K. Seo, K.-W. Lee and **J.-H. Park** 1487 The preliminary 3D dynamic simulation on the RSR dismantling process of the KRR-1&2

NUMBER 15

H. van Dam 1495 Flux distributions in stable criticality waves

W. Ambrosini and **J.C. Ferreri** 1505 Prediction of stability of one-dimensional natural circulation with a low diffusion numerical scheme

I.A. Reyhancan, M. Bostan, A. Durusoy, A. Elmalı, A. Baykal and **Y. Özbir** 1539 Measurements of isomeric cross sections for (n,2n) reaction on ^{140}Ce, ^{142}Nd and ^{144}Sm isotopes around 14 MeV

J. Kwon, S.C. Kwon and **J.-H. Hong** 1549 Prediction of radiation hardening in reactor pressure vessel steel based on a theoretical model

G.-C. Lee and **S.H. Chang** 1561 Radial basis function networks applied to DNBR calculation in digital core protection systems

R. Plukiene and **D. Ridikas** 1573 Modelling of HTRs with Monte Carlo: from a homogeneous to an exact heterogeneous core with microparticles

Technical notes

I.B. Plecas 1587 Effect of curing time on the fraction of Cs^{137} from cement matrix

M. Zaker 1591 Effective delayed neutron fraction and prompt neutron lifetime of Tehran research reactor

M.M.R. Williams 1597 Book review and announcement

S. Pelloni 1599 Erratum

NUMBER 16

X. Sun, M. Ishii and **Joseph M. Kelly** 1601 Modified two-fluid model for the two-group interfacial area transport equation

D. Ene 1623 Safety studies related to the spent fuel storage of the Romanian VVR-S reactor

R. Sanchez 1645 The Moments Method for the one-group transport and diffusion equations

C.M.N.A. Pereira and **C.M.F. Lapa** 1665 Parallel island genetic algorithm applied to a nuclear power plant auxiliary feedwater system surveillance tests policy optimization

Technical notes

I.S. Kim, S.W. Cheon and **M.C. Kim** 1677 Nuclear equipment parts classification: a functional modeling approach

I. Slessarev and **P. Bokov** 1691 On potential of thermo-nuclear fusion as a candidate for external neutron source in hybrid systems (applied to the "WISE" concept)

M.C. Thorne 1699 Book review

S.B. Degweker 1701 Corrigendum

NUMBER 17

A SPECIAL ISSUE IN HONOUR OF PROFESSOR HUGO VAN DAM ON THE OCCASION OF HIS RETIREMENT

T.H.J.J. van der Hagen 1703 Editorial: In honour of Professor Hugo van Dam on the occasion of his retirement

M.M.R. Williams 1707 An application of the 'end-point' method to the minimum critical mass problem in two group transport theory

F. Jatuff, A. Lüthi, M. Murphy, T. Williams and **R. Chawla** 1731 Measurement and interpretation of delayed photoneutron effects in multizone criticals with partial D_2O moderation

I. Pázsit 1757 Hugo van Dam and the dynamic adjoint function

S. Şeker, E. Türkcan, E. Ayaz and **B. Barutçu** 1777 Artificial neural networks for dynamic monitoring of simulated-operating parameters of high temperature gas cooled engineering test reactor (HTTR)

D. Lathouwers 1793 Iterative computation of time-eigenvalues of the neutron transport equation

J.L. Kloosterman 1807 Application of boron and gadolinium burnable poison particles in UO_2 and PUO_2 fuels in HTRs

NUMBER 18

M. Bostan, E. Gültekin and **I.A. Reyhancan** 1821 Cross-section measurements for the ^{97}Mo (n,p) ^{97m}Nb reaction at the neutron energies from 13.6 to 14.9 MeV

A. Dall'Osso 1829 Introducing the migration mode method for the solution of the space and energy dependent diffusion equation

H. Sakane, Y. Kasugai, M. Shibata, H. Takeuchi and **K. Kawade** 1847 Measurements of the (n, $np+d$) activation cross sections with 13.4–14.9 MeV neutrons using a fusion neutronics source/JAERI

Y. Okano and **A. Yamaguchi** 1863 Numerical simulation of a free-falling liquid sodium droplet combustion

E. Fort, G. Rimpault, J-C. Bosq, B. Camous, V. Zammit, E. Dupont, R. Jacqmin, P. Smith, D. Biron and **D. Verrier** 1879 Improved performances of the fast reactor calculational system ERANOS-ERALIB1 due to improved a priori nuclear data and consideration of additional specific integral data

Technical notes

I. Plecas 1899 Immobilization of ^{137}Cs and ^{60}Co in concrete matrix

M. Adib, N. Habib, A. Ashry and **M. Fathalla** 1905 On the use of silicon as thermal neutron filter

D. Vande Putte 1919 Book review

J.S. Cassell and **M.M.R. Williams** 1921 Erratum
